

Role: Technical Compliance Manager

Have you got an eye for technology and regulation?

We are looking for a Technical Compliance Manager to help us deliver the ultimate package for casino operators and their players in a regulated market.

Hosted, updated and managed by our dedicated global technology teams, our casino platform is designed for rapid deployment and seamless integration into a huge library of online casino games. Whilst delivering this solution we need to ensure that our technology is compliant with the relevant market regulations.

You will be involved in ensuring we are complaint in existing and future markets, you will need to be able to multi task between scoping requirements for future markets as well as dealing with live operational issues from existing markets.

What you need to succeed:

Ability to gain a solid understanding of the technical regulatory compliance requirements and be able to clearly communicate these to relevant technical teams. Ability to successfully identify and implement risk-based compliance procedures and programmes to help with monitoring, reporting, escalations, issue resolutions to prevent and deal with any possible breaches.

Strong ability to build relationships internally and externally will be a key part of this role and the individual will need the ability to create and maintain these relationships at all levels.

Ideally, you will have experience in the following areas:

- Proven technical experience with Information Technology, SDLC and experience in the gaming industry.
- Working with regulatory bodies
- Proven experience in the management of the licensing and compliance processes within a gaming compliance role.
- Experience establishing probity processes and onboarding new customers would be an added advantage.
