

Role: IT Architect

Is technology your game? Got the skills to play with?

We are looking for a passionate **IT Architect** to help level up our cutting-edge platform, delivering the ultimate package for casino operators and their players.

Hosted, updated and managed by our dedicated global technology teams, our casino platform is designed for rapid deployment and seamless integration into a huge library of online casino games.

Can you develop, document and maintain the technology strategy and gain organizational commitment for the technology roadmap and strategy. You will need to initiate and drive projects to evaluate technologies and develop strategies to implement the required solution for the business.

What you need to succeed:

Ability to develop, document and maintain the high-level architectural design for the company infrastructure systems and services. Develop service and system architecture designs which satisfy both business and operational requirements. Ability to provide technical leadership and consulting across the organisation, from strategic decision making down to the project planning level.

Ideally, you will have experience using:

- Proven ability to design IT solutions using local hardware or cloud solutions
- In depth IT Infrastructure knowledge and experience across multiple domains.
- Knowledge, respect & appreciation for all IT disciplines required to build technology-based solutions.
- Strong communication and people management skills
- Ability to produce high quality research and design documentation.
- Conceptual and Strategic Thinker
- 10 + years IT Experience
- 2 + years designing and implementing IT solutions
- Relevant degree and/or equivalent experience
- Microsoft Technologies
